STEPHANIE E. AYUBA

Senior QA Automation Lead ● Playwright & TypeScript Automation ● AI/LLM & Security Testing

stephanieesha@gmail.com | GitHub | Portfolio

PROFILE SUMMARY

QA automation lead with 7+ years in SaaS and HealthTech, building test automation that holds up in CI/CD across fully remote teams. Serve as a trusted partner to engineering and product on test strategy and release risk, using quality data to guide decisions, including a 60% reduction in post-release defects. Known for catching edge-case and security bugs before they reach users, and for bringing AI-assisted testing into everyday QA work.

CORE SKILLS & TECHNOLOGIES

Test Automation: Playwright (TypeScript, Python), Cypress, Selenium, Appium, Page Object Model, self-healing tests
Languages & APIs: TypeScript, JavaScript, Python, SQL, Postman, REST APIs, GraphQL, gRPC, Swagger
AI Quality: LLM feature testing (hallucinations, prompt injection), AI response evaluation and rubric grading, Playwright MCP, AI tools (Claude Code, GitHub Copilot, Aider)
Security & Accessibility: OAuth2, SAML SSO, RBAC, CSRF and XSS testing, CVE triage (Trivy, Grype), WCAG accessibility testing
CI/CD & Infrastructure: GitHub Actions, Jenkins, Azure DevOps, Docker, Kubernetes, BrowserStack, Grafana/Loki, Sentry
Methods & Tools: Agile/Scrum (PSM I), risk-based testing, performance testing, root cause analysis, Jira, Xray, TestRail, Zephyr

WORK EXPERIENCE

Globo | Philadelphia, PA, USA **March 2022 to Present**

Senior QA Automation Lead

- Lead a globally distributed QA team, coaching testers on automation practices and AI-assisted tools.
- Own test strategy for web and mobile releases, setting risk-based priorities and acting as release gatekeeper.
- Build and maintain Playwright (TypeScript) automation, with quality gates in GitHub Actions and Azure DevOps.
- Test AI and LLM features for hallucinations and prompt injection, and evaluate model responses against scoring rubrics.
- Automate REST and GraphQL API validation with Postman and Playwright, covering OAuth2 flows and RBAC permissions.
- Check web flows for CSRF and XSS vulnerabilities, and triage dependency CVEs with Trivy and Grype.
- Investigate escaped defects with root cause analysis, feeding each fix back into regression coverage.

Key Achievement: Reduced post-release defects by 60% by expanding automated test and validation coverage across critical user flows.

Ehealth4everyone | Abuja, Nigeria **July 2019 to December 2021**

Software Quality Assurance Engineer

- Drive the move from Selenium (Python) to Cypress, building faster and more stable suites that run in Jenkins CI.
- Act as QA representative in stakeholder meetings, turning product requirements into clear acceptance criteria.
- Test iOS and Android apps with Appium and BrowserStack, including IoT device flows such as OTA updates and offline recovery.
- Test SAML SSO login and session handling for security gaps, alongside WCAG accessibility audits.
- Measure performance on key user journeys to find bottlenecks before release.
- Track defect escape rate and First Pass Yield, using the data to guide process improvements.
- Coordinate the QA team's day-to-day testing work and mentor newer testers.

Key Achievement: Implemented structured QA processes that improved defect tracking and release confidence across the team.

SELECTED PROJECTS

- **Flaky Test Detector & Auto-Quarantine System** (Playwright, TypeScript, GitHub Actions): Monitor test reliability across projects in CI, quarantining tests that cross an instability threshold and opening a GitHub issue for investigation.
- **AI Test Case Generator** (Python, Flask, Claude API, Jira REST API): Generate BDD or step-by-step test cases from real Jira tickets, learning from past cases to match the team's style.
- **Accessibility Audit Tracker** (Playwright, axe-core, TypeScript): Run accessibility scans on demand or on a schedule, tracking WCAG violations over time down to the exact elements that need attention.
- **Quality Metrics Dashboard** (Python, Flask, Chart.js): Turn bugs caught by the Flaky Test Detector into quality insights, grouping them by root cause and weighting them by severity.

EDUCATION

Federal University of Technology, Minna, Niger State, Nigeria
Bachelor's Degree in Computer Engineering; Varsity Volleyball

CERTIFICATIONS

Professional Scrum Master (PSM I), Scrum.org
ISTQB Certified Foundation Level Tester
